

# Australian Camel Milk Industry Forum

25-26 May 2017

Adelaide, South Australia

**The Australian Camel Milk Industry Forum held in May 2017 invited Australia camel milk industry stakeholders to hear presentations on the following themes:**

- Health and disease management
- Nutrition management
- Husbandry and hygiene and staff training
- Dairy management
- Selective breeding

The two-day forum was supported by AgriFutures Australia.

New and emerging animal industries play an important part in the Australian agricultural landscape. In addition to contributing to the national economy they provide alternative enterprises to rural and regional communities. Camel milk is an example of a relatively new and emerging industry.

For additional information on camel and camelid research supported by AgriFutures Australia, visit the AgriFutures Australia website.
